Passage 1

More people get hurt snowboarding than any other outdoor activity, accounting for a quarter of emergency room visit. According to researchers, following snowboarding, sledding and hiking are major causes of injuries. The most common problems were broken bones and sprains, accounting for half of all cases.

The researcher Greenspan said: "We want people to participate in outdoor activities. But we want people to recognize that there is cause for concern, and people can and do get injured." She further said that injuries can be avoided through planning and preparation making sure your fitness level and skills match the activity and using proper equipment. Greenspan also mentioned that the study is the first to look at injuries from all activities, instead of individual sports or geographic areas. The researchers looked at data on injuries from outdoor activities treated at 63 hospitals in 2004 and 2005. They calculated that almost 213.000 people were treated yearly for such injuries nationwide. About half of those injuries are young between ages 10 and 24, and half of the injuries are caused by falls.

Males are injured at twice the rate of females, but the research did not look at the reasons. The reasons could be that males are more risky, or it could be that males participate more in outdoor activities than females, or a combination of both. Nearly 26 percent of the injures were from snowboarding followed by sledding (11 percent) , hiking (6 percent), water skiing (4 percent) finishing (3 percent) , and swimming (2 percent).

- 66) What percentage of all injuries resulted in a broken bone or a sprain?
1) fifty percent 2) a quarter 3) almost one third 4) eleven percent
- 67) Do men or women get hurt more?
1) They get hurt about the same.
2) Men get hurt twice as much as women
3) Men get hurt slightly more than women
4) Women participate more in outdoor activities
- 68) What activity is the third biggest cause of injuries?
1) Snowboarding 2) Sledding 3) Water skiing 4) Hiking
- 69) According to Greenspan, how can injuries be avoided?
1) By going to a hospital 2) By planning and preparation
3) Water skiing 4) By avoiding falls
- 70) What percentage of emergency room visit are the result of outdoor activity injuries?
1) 50% 2) 33% 3) 25% 4) 63%

Passage 2

Theories about how brain works remain a topic of debate. It is agreed, however, that the hippocampus, a part of the brain, is undeniably important for memory. When we experience something, the information is sent via our senses to the hippocampus, where, it is processed. Scientists believe that brain cells, called neurons, first transform the sensory stimuli we experience into images in our immediate memory. Then, these images are sent to the hippocampus and stored temporarily in short term memory. In the hippocampus information is organized, and it is during this process that parts of the image of our experience **fade away**.

Finally, certain information is then transferred to long term memory in a section in the frontal area of the brain, known as the cerebral cortex. Scientists think this process may happen while we are sleeping, but exactly how the information is transferred from one area of the brain to another is a mystery.

- 71) What is the best title for the passage?
- 1) **How Brain Works**
 - 2) Structure of Long Term Memory
 - 3) Storage of Data
 - 4) Transfer of Information
- 72) This reading is mainly concerned with
- 1) how to improve our memory
 - 2) illness that results in severe memory loss
 - 3) the importance of neurons in transferring sensory stimuli
 - 4) **how human brain processes and stores information**
- 73) According to the passage, scientists
- 1) still debate whether the hippocampus is important for memory
 - 2) **don't know exactly how the information is transferred from one area of the brain to another**
 - 3) have found out why some of the information is lost in the hippocampus
 - 4) know that information is sent from the long term memory to the hippocampus
- 74) It is pointed out in the passage that
- 1) the brain was not considered as a highly complex organ in the past
 - 2) damage to hippocampus does not cause memory loss
 - 3) **scientists agree that hippocampus is important in processing information**
 - 4) hippocampus is in the frontal area of the brain
- 75) In line 7 , "fade away" is closest in meaning to
- 1) become
 - 2) **slowly disappear**
 - 3) get brighter
 - 4) easily recognized

Passage 3

First language, also known as mother tongue, is generally the language a person learns first. However, one can have two or more native languages, thus being a native bilingual or indeed multilingual. The order in which these languages are learned is not necessarily the order of proficiency. Lacking in first language skills often makes learning other languages difficult. Often a child learns the **basics** of his or her first language or languages from his or her family. The term mother tongue, however, should not be interpreted to mean that it is the language of one's mother. For instance, in some paternal societies, the wife moves in with the husband and thus may have a different first language or dialect than the local language of the husband. **Yet** their children usually only speak their local language.

- 76) According to the passage, first language skills
- 1) are not transferable to the second language
 - 2) can also have negative effects in foreign language acquisition
 - 3) take a very long time to develop
 - 4) **play an important role in learning a new language**
- 77) We understand from the passage that.....
- 1) **one's mother tongue might not be the language of the parents**
 - 2) most bilinguals don't have a dominant language
 - 3) the learning of a first language is the most complex skill
 - 4) most children have learning difficulties in acquiring their first language
- 78) One can infer from the reading that
- 1) bilinguals use their two languages for different purposes
 - 2) children cannot be a native speaker of more than two languages
 - 3) **it is possible for a bilingual to become more competent in his second language**
 - 4) very few children throughout the world learn to speak two languages
- 79) In line 5, "basics" is closest in meaning to
- 1) arrangements
 - 2) **fundamentals**
 - 3) assumptions
 - 4) origins
- 80) In line 9, "YET" is closest in meaning to
- 1) rarely
 - 2) so
 - 3) often
 - 4) **but**

Passage 4

People seldom feel neutral about poetry. Those who love it sometimes give the impression that it is an adequate substitute for food, shelter, and love. But it isn't. Those who dislike poetry sometimes claim, on the other hand, that poetry is only words and good for nothing. That's not true either. When words represent and recreate **genuine** human feelings, as they often do in poetry, they can be very important. Poems provide, in fact, a language for feeling, and one of poetry's merits involves its attempt to express the inexpressible. One of the joys of experiencing poetry occurs when we read a poem and want to say, "I know exactly what that line means but I have never been able to express it so well." Poetry can be the voice of our feelings even when our minds are speechless with **grief** or joy.

- 81) One can understand from the passage that people
- 1) seldom feel that poetry is an equivalent for life itself
 - 2) **generally think of poetry as extremely important or totally useless**
 - 3) rarely take a biased opinion about poetry
 - 4) generally think that poetry expresses what might seem inexpressible
- 82) One point made by the author in the passage is that poetry
- 1) tends to make the reader disappointed
 - 2) is an adequate substitute for food, shelter, and love
 - 3) **often captures real human feelings**
 - 4) is impossible to be defined
- 83) The author points out in the reading that.....
- 1) poems are primarily about how people think rather than how people feel
 - 2) **poetry tries to express what people feel but find it hard to describe**
 - 3) poetry can't be the expression of one's deepest feelings
 - 4) few people think that poetry is neutral
- 84) In line 4, "genuine" is closest in meaning to
- 1) disputable
 - 2) fantastic
 - 3) unpredictable
 - 4) **authentic**
- 85) In line 9, "grief" is closest in meaning to
- 1) gaiety
 - 2) delight
 - 3) **sorrow**
 - 4) mood
